Question # 6

Revisit

A custom object Job_Application has a lookup relationship with another custom object called Candidate. On the lookup field in Job_Application, currently candidate name field which is an auto-number is the only field that is visible in the lookup dialog. Management wants to display few more details of candidate like first_name, Last_name and email_ID on the lookup dialog. How will a developer meet this requirement using any declarative approach feature? Choose most appropriate option

Choose the best option.

- ☐ Additional fields from candidate object cannot be displayed using any declarative approach.
- ☐ It is not possible to implement this requirement as candidate is a custom object.
- ☐ It is not possible to meet this requirement as there is a lookup relationship between the objects.
- ☒ Customize the lookup dialog in search layouts to include required fields.
