1)) Which of the following is not a valid controller in the visual force page

    A. List controller
    B. Standard controller
    C. Page controller
    D. Controller extension

2) A lightning component developer want to fetch data of a customer obj Review_c from database and want to display on component. what type of controller should be used?

    A. Standard list controller
    B. Extension controller
    C. Client side controller with server side controller
    D. Standard controller

3) Which of the following attribute is used to map the URL platform Rest resource annotation?

    A. URL pattern
    B. URL map
    C. URL text
    D. URL mapping

4) Consider the following code, select appropriate statement to print value of the message attribute

    <aura:component>

    <aura:attribute name="message" type="string"/>

    <p> hello!_____</p></aura:component>

    A. {v.message}
    B. {!message}
    C. {message}
    D. {!v.message}

5) What is true about <apex:pageBlockTable>tag?

    A. It should be inside <apex:pageBlock>tag
    B. No need to define inside <apex:pageBlock>tag
    C. We need to specify column headers
    D. Automatically it will display column headers

6) Which automation will be used to expose an apex class as REST resource?

    A. "@" RestResource
    B. "@"ResourceRest
    C. "@"HttpResource
    D. "@"RestHttp

7) Which class contains the rest request &rest response objects in REST full webservice> [A OR C]

A. ==RestHttp==
B. Restcontent
C. RestContext
D. Restcontainer

8) Below given is the controller code for a component identify missing code

Public with sharing class expenses controller{

Return [select id,name,account_c,client_c,date_c,reimbursed_c,curated date FROM expense_c]}}

A. =="@" Aura enabled annotation for get expense()==
B. "@" allow access annotation for get expense()
C. "@" is test annotation for get expense()
D. "@"aura annotation for get expense()

9) What are the consideration to enable my domain? ==[AD OR BC]==

A. A vfpage URL will charge
B. Assign domain to specific profile users
C. Once domain is registered, it cant be reserved
D. Login salesforce.com cant be used to login to org once domain is registered.

10) My domain is not required at the very beginning to develop with the lightning component?

A. True
B. ==False==

11) Which global value provider we use to the static resource? choose right one?

A. ==$resource==
B. $lightning
C. $A
D. $Static resource

13) Which tool you will be add a lightning component on a record page?

A. Flow builder
B. Report builder
C. Foum builder
D. ==App builder==

14) What is/are purpose of setting "my domain" choose appropriate?

A. Customize login page with your over boarding
B. My domain as a security to help parent malicious attacks
C. My domain will allow us to have a customer domain from org
D. ==All of the above==

16) What is the correct order of execution in visual force page?

A. <mark>Action method of the page</mark>
B. Client side js functions
C. Constructors
D. Getter methods

17) When<apex:form> tag is mandatory in vfpage?

A. When we use command button links
B. We need to add <apex:form> tag inside <apex:pageBlock>
C. When we use HTML tags in VF page
D. <mark>When we use any <apex:input field> tag</mark>

18) Identify correct tag to associate a standard list controller with a vf page?

A. <apex:page standard controller with a vfpage
B. <apex:page controller ="accounts">
C. <apex:page controller="account" recordsetvar="account">
D. <mark><apex:page standard controller="account" resordsetvar="account"></mark>

19) To pass the values from vf page to controller we use getter method?

A. True
B. <mark>False</mark>

20) In-line CSS can be used in VF page?

A. <mark>True</mark>
B. False

21) Which of the following annotation you will add to your method to expose it as REST resource that can be called by HTTP GET request? <mark>[A OR B]</mark>

A. "@" HttpPost
B. "@"HttpGet
C. "@"HttpPut
D. "@"HttpDelete

22) Which function we use to retrieve value server side apex method?

A. Get Return value ()
B. Get value()
C. <mark>Get Return Value()</mark>
D. Get Value()

23) Which of the following is NOT a valid binding in the vfpage?

A. Data binding
B. <mark>Event binding</mark>
C. Action binding

D. Component binding

24) Identify the following correct statement from below?

A. <apex:page showheader="false" sidebar="false" standard controller="account" extensions="Mycontroller">
B. <apex:page standardcontroller="mycontroller" extensions="mycontroller!">
C. <apex:page controller="account" extensions="ext1","ext2">
D. <apex:page controller="contact" recordsetvar="mycontacts">

25) Below given controller for a component, how would a component use this controller?

Public with sharing class expenses controller{

------------// code

}

A. <aura:component standard controller="expenses controller">
B. <aura:component controller="expenses controller">
C. <aura:component implements ="expenses controller">
D. <aura:component class controller="expenses controller">

26) Which context variable provides a list of sobjects which can use only in insert, update & undelete triggers?

A. Old
B. Oldmap
C. New
D. Newmap

27) Identify the standard lightning components(choose3) [ABC OR ABD]

A. List view
B. Rich text
C. Visual force page
D. Reports

28) To make lightning component available for the any type of page, it must implement which interface?

A. Flexi:page: available for all page types
B. Flexi:page: available for page types
C. Flexi:page: available for all types
D. Flexi:page for all page types

29) How can a developer refer to or instant a page reference in apex(select 2)

A. Using a page reference with URL
B. Using the page obj & visualforce page name
C. Using apex.pages() method with a visual force page name

D. Page block Table page has wrong attribute named value

30) A vf page can be represented in a dashboard and vf page component?

   A. True
   B. False

31) Which function we use to put server-side apex method call in queue?choose option

   A. $A.queue action()
   B. $A.enqueue action()
   C. $A.lightning queue action()
   D. $A.lightning emqueue action()

32) An apex class is used custom controller in one of the vf page for position object to display list of position object to display list of position records in a page block table-------- choose most appropriate option

   A. Recordsetvar can only be used in standard controllers
   B. Soql query is written in controller
   C. List varaiable positions is private
   D. Pageblocktable tag has wrong attribute named value

33) Which two components are supported when building lightning pages with in lightning app builder? Choose two [AB OR BD]

   A. Related records
   B. Chatter feed
   C. Social view
   D. Flows

34) Which of the following are part of lightning component bundle(choose 3)

   A. Style
   B. Controller
   C. Builder
   D. Helper

35) Identify correct syntax to call a function while loading a vf page?

   A. <script type="text/javascript">
      Function() {
      Alert ("hello");
      }; </script>
   B. <apex:page action (!.onload)> </apex:page>
   C. <apex:page controller= "{!onload}"> </apex:page>
   D. <apex:page controller ="my control </apex:page>

36) When is <apex:form> tag is mandatory for vf (select 2) [AD OR BD]

A. When we use command buttons/links
B. When we need to have <apex:form> tag inside <apex:pageblock>
C. When we use HTML tags in vf pages
D. When we use any <apex:input field> tag

37) Which access specific you will use for a class & methods to publish them as SOAP we-serivices

A. Public, webservice
B. Public, webmethod
C. Global , webmethod
D. Global , webservice

38) Select appropriate option to fill in blanks which should call client-side controller method by clicking on a button of a component?

<div>

<lightning:button label="you look like today" on click="----"/>

<div> gret.s {

Handle click=function(cmp, event, helper) { alret ("welcome");}}

A. {!handleclick}
B. {!c.handleclick}
C. {c.handleclick}
D. {!cihandleclick}

39) A component has an attribute message. Select appropriate statement to set the value of the message from client- controller method with a message

Handleclick2:function(comp,event,helper)

Varhene message = event.getsource().get ("varaiable")

Cansde.log("handleclick2:message:+new message")

// add correct statement below

A. Component.set("message",new message);
B. Component.set("!v.message",new message);
C. Component.set("v.message",new message);
D. Component.get("v.message",new message);

40) Which keyword is used in vf page controller to prevent data to saved in view statement

A. Static
B. Extend

C. Transient
D. Boolean

41) Which is default page size for a standard list controller?

A. 10
B. 15
C. 20
D. 25

42) How to refer a static resource image into vf page?(select 2)

A. <Apex:image url = "{!$resource.testimage}" width="50" height='50"/>
B. <Apex:image url ="{!$URL FOR (resource.testzip)}" width="50" height='50"/>
C. <Apex:image url ="{!$URL FOR (resource.testzip,"messages"/"tag")}width="50" height='50"/>
D. <Apex:includeimage url ="{!$resource.testimage}" width="50" height='50"/>.

43) Which scenario can be supported by apex webservice

A. An api session invoking as apex webservice
B. A trigger executing a sync call out
C. A trigger executing async call out
D. A vf page controller performing an httpcallout

44) How can following code be utilized

   <apex:page standard controller="my_object_c

    <paex:pageblock---------------------------</apex:page>

A. As an override for a new action for the my_obj_c object
B. As the target for custom list button on my_object_c object
C. As target for custom link on home tab
D. As an override of list action for my_obj_c custom object

45) Dynamic apex feature

        Obj/field

          Soql

          Dml

              Sosl-------list<listsobj>

A. a-1,b-2,c-3,d-4

46) A job app obj has a child review object to store candidate review, needs score between 1 to 5. [displayed as radio button] how can developer cater to this reuirement?

A. Create 5 fields for scores (1-5) of type radio button & use in review page layout
B. Create a dependent picklist that feeds radio button
C. Create a formulae field
D. Create a vf page with radio buttons for review object

47) A customer has a requirement to filter on coulumns in related list. As a developer how will you accomplish?

A. Use filter option in related list section of page layout
B. Use filter option in related list section of mini page layout
C. Use filter option in deatiled page layout of related list object
D. Build a vf page component with filter to replace related list section of a page layout.

48) An org has created a HR app which contains a custom obj for job positions& candidates--------requirement?

A. Add an iline vf page on job position pagelayout
B. Add candidate related list to job position page layout
C. Create a validation rule on job position page layout
D. Create a formula field on job position object and add to page layout

49) What is correct order of execution in vf page?

a) Action method of page
b) Client side js function
c) Constructions
d) Getter methods
ANSWER:- 3-1-4-2

Ques1) Which access specifier you will use for a class and methods to publish them as SOAP web-service?

   a. public, webservice
   b. public, webmethod
   c. global, webmethod
   d. global, webservices   ✓

Ques2) Which of the following are part of lightning component bundle? Choose three most appropriate options.

   a. style   ✓
   b. controller   ✓
   c. builder
   d. helper   ✓

Ques3) A component has an attribute message. Select the appropriate statement to set the value of message from client-controller method with newMessage.

handleClick2: function(component. event. helper) {

var newMessage = event.getSource().get("v.label");

console.log("handleClick2: Message: " + newMessage);

//Add correct statement below

}

   a. component.set("message",newMessage);
   b. component.set("{v.message)", newMessage);
   c. component.set("v.message", newMessage);   ✓
   d. component.get("v.message", newMessage);

Ques4) Identify the correct syntax to call a function while loading a Visualforce page?

   a. <script type = "text/javascript">
         function()
         {
             alert("Hello");
         };
      </script>
   b. <apex:page action="{!onLoad}">   ✓
      </apex:page>
   c. <apex:page controller="{!onLoad}">
      </apex:page>
   d. <apex:page controller="MyController">
      </apex:page>

Ques5) Which annotation will be used to expose an Apex class as REST resource?

    a. "@"RestResource   ✓
    b. "@"ResourceRest
    c. "@"HttpResource
    d. "@"RestHttp

Ques6) Below given is the controller code for a component. Identify what is missing in the code.

public with sharing class ExpensesController {

  public static List<Expense_c> getExpenses() {

    return [SELECT Id, Name, Amount_c, Client_c, Date_c,

         Reimbursed_c, CreatedDate

      FROM Expense_c];

  }

}

    a. "@"AuraEnabled annotation for getExpense()   ✓
    b. "@"AllowAccess annotation for getExpense()
    c. "@"isTest annotation for getExpense()
    d. "@"Aura annotation for getExpense()

Ques7) Which of the following attribute is used to map the URL pattern to RestResource annotation?

    a. urlPattern
    b. urlText
    c. urlMap
    d. urlMapping   ✓

Ques8) Consider the following code. Select appropriate statement to print the value of message attribute.

<aura:component>

  <aura:attribute name="message" type="String"/>

  <p>Hello! --------------------</p>

</aura:component>

    a. {v.message}
    b. {! message}
    c. {message}
    d. {!v.message}   ✓

Ques9) Which two components are supported when building Lightning pages with the Lightning App Builder? Choose two most appropriate options.

a. Related Records
b. Chatter Feed   ✓
c. Social View
d. Flows   ✓

Ques10) What is/are the purpose(s) of setting 'MyDomain'? Choose most appropriate option.

a. Customize the login page with your own branding
b. My Domain as a security measure to help prevent malicious actions
c. My Domain will allow us to have a custom domain for our org
d. All the above   ✓

Ques11) Below given is the controller for a component. How would a component use this controller? Select the appropriate option.

public with sharing class ExpensesController {

  //some code here….

}

a. <aura:component StandardController="ExpensesController">
b. <aura:component controller="ExpensesController">   ✓
c. <aura:component implements="ExpensesController">
d. <aura:component class="ExpensesController">

Ques12) Which of the following annotation you will add to your method to expose it as a REST resource that can be called by an HTTP GET request?

a. "@"HttpPost
b. "@"HttpGet   ✓
c. "@"HttpPut
d. "@"HttpDelete

Ques13) Which class contains the RestRequest and RestResponse objects in RESTful webservice?

a. RestHttp   (Doubtful)
b. RestContent
c. RestContext   ✓
d. RestContainer

Ques14) Which function we use to receive value from server side apex method? Choose most appropriate option.

a. **getReturnvalue()** ✓
b. getValue()
c. **getReturnValue()**   ✓
d. getvalue()

Ques15) Below given is the controller code for a component. Identify what is missing in the code.

```
public with sharing class ExpensesController {

    public static List<Expense_c> getExpenses() {

        return [SELECT Id, Name, Amount_c, Client_c, Date_c,

                    Reimbursed_c, CreatedDate

                FROM Expense_c];

     }

}
```

a. "@"AuraEnabled annotation for getExpense()   ✓
b. "@"AllowAccess annotation for getExpense()
c. "@"isTest annotation for getExpense()
d. "@"Aura annotation for getExpense()

Ques16) Which tool you will use to add a Lightning component on a Record Page?

a. Flow Builder
b. Report Builder
c. Form Builder
d. App Builder   ✓

Ques17) A Lightning component developer want to fetch data of a custom object Review_c from database and want to display on a component. What type of controller should be used?

a. **Standard List controller**   ✓
b. Extension controller
c. Client-Side controller with Server-Side controller
d. Standard controller

Ques18) What are the consideration to enable my domain? (Select 2)

a. VF page URL's will change   ✓
b. Assign domain to specific profile users
c. Once domain is registered, it cannot be reversed   ✓
d. Login salesforce.com cannot be used to login to org once domain is registered

Ques19) Which of the following is NOT a valid binding in Visualforce page?

a. Data binding
b. Event binding   ✓
c. Action binding
d. Component binding

Ques20) A visualforce page can be represented in a dashboard VFPage component. State True or False.

TRUE   ✓

Ques21) My Domain is NOT required at the very beginning to develop with lightning component?

FALSE ✓

Ques22) Identify the correct tag to associate the Standard List Controller with a Visualforce Page?

    a. <apex: page standardController="Acccount">
    b. <apex: page controller="Acccount">
    c. <apex: page controller="Acccount" RecordSetVar="Account">
    d. **<apex:page standardController="Acccount" RecordSetVar="Account">**   ✓

Ques23) An organization has created a HR application which contains a custom object for job positions and candidates for those positions. The HR managers want to see a view of the position with the best candidates for that position and not just all the candidates listed. What is the best method to fulfill the requirement?

    a. **Add an inline Visualforce Page on the job position page layout**   ✓
    b. Add the candidate related list to the job position page layout
    c. Create a validation rule on the job position page layout
    d. Create a formula field on the job position object and add to the page layout

Ques24) To pass values from Visualforce page to controller we use getter method?

FALSE ✓

Ques25) An apex class is used as a Custom controller in one of the VF Pages for Position object to display list of Position records in a pageBlock table along with a recordSetVar attribute as shown below. Entire program throws a compile time error on VF page when it is saved. What could be the possible reason?

Choose most appropriate option.

    a. **recordSetVar can only be used with a standardController**   ✓
    b. SOQL query is written in the constructor
    c. List variable positions is private
    d. pageBlockTable tage has wrong attribute named value

Ques26) In-line CSS can be used in visualforce page.

TRUE ✓

Ques27) Which keyword is used in visualforce page controller to prevent the data to be saved in view state?

    a. Static
    b. External
    c. **Transient**   ✓
    d. Boolean

Ques28) Which global value provider we use to refer static resource? Choose most appropriate option.

    a. **$Resource**   ✓

b. $Lightning
c. $A
d. $StaticResource

Ques29) What is the correct order of execution in Visualforce page?

1)Action Method of the page
2)Client side JS functions
3)Constructors
4)Getter methods

a. **3,1,4,2**   ✓
b. 1,3,4,2
c. 1,2,4,3
d. 2,1,4,3

Ques30) What is default page size for a Standard List Controller?
a. 10
b. 15
c. **20**   ✓
d. 25

Ques31) Which of the following are true about component bundle? Choose two most appropriate options.
a. **component refers controller functions**   ✓
b. **component refers helper functions**   ✓
c. controller refers helper functions
d. controller refers other controller functions

Ques32) Which function we use to put server side apex method call in queue? Chhoose most appropriate option.
a. $A.queueAction()
b. **$A.enqueueAction()**   ✓
c. $Lightning.queueAction()
d. $Lightning.enqueueAction()

Ques33) How to reference a state resource image into visualforce page? (Select 2).
a. **<apex:image url="{1$ Resource.TestImage}" width="50" height="50"/>**   ✓
b. <apex:image url="{1URLFOR($Resource.TestZip}}"width="50" height="50"/>
c. **<apex:image url="{1URLFOR ($ Resource.Test Zip,"images/Bluehills.jpg")}" width="50" height="50"/>**   ✓
d. <apex:Includeimage url = "{! Resource.TestImage}" width = "50" height = "50"/>

Ques34) A customer has a requirement to filter on columns in the related list. As a developer how will you accomplish?
a. Use the filter option in the related list section of the Page Layout
b. Use the filter option in the related list section of the Mini Page Layout

c. Use the filter option in the detail page layout of the related list object
d. Build a visual force component with filter to replace the related list section of the Page Layout ✓

Ques35) Identify the correct statement from below?

a. **<apex:page showHeader="false" sidebar="false" standardController="Account" extensions="MyController">** ✓
b. <apex:page standardController="MyController" extensions="MyController1">
c. <apex:page controller="Account" extensions="ext1,ext2">
d. <apex:page controller="Contact" recordSetVar="MyContacts">

Ques36) Which context variable provides a list of sObjects which we can use only in insert, update and undelete triggers?

a. old
b. oldMap
c. **new** ✓
d. newMap

Ques37) Which is not a valid controller in Visualforce page

a. List Controller
b. Standard Controller
c. **Page Controller** ✓
d. Controller Extension

Ques38) When is <apex:form> tag is mandatory in VF pages? (Select 2)

a. **When we use Command button/links** ✓
b. We need to add<apex:form> tag inside <apex:pageblock**>**
c. **When we use html tags in vf page** ✓
d. When we use any <apex:inputField> tag

Ques39) To make a Lightning component available for any type of page, it must implement which interface?

a. **flexipage:availableForAllPageTypes** ✓
b. flexipage:availableForPageTypes
c. flexipage:availableForAllTypes
d. flexipage:ForAllPageTypes

Ques40) What is true about <apex:pageBlock Table> tag? (Select 2)

a. **It should be inside the <apex:pageBlock> tag** ✓
b. No need to define inside the <apex:pageBlock> tag
c. We need to specify column headers explicitly
d. **Automatically it will display Column Headers** ✓

Ques41) Identify the standard Lightning components. Choose three most appropriate options.

a. **List View** ✓

b. **Rich Text** ✓
c. **Visualforce Page** ✓
d. Reports

1. Which of the following is true about visual flows?

a.) A visual flow cannot be created

b.) A visual flow can have only one

c.) A visual flow can have multiple

d.) A visual flow cannot be deployed

2. Select the appropriate option to fill in the blanks which should call the client side controller method by clicking on a button of a component
Ans: option B

3. Which scenario can be supported by apex webservices ?

Ans: A trigger executing Async callout

```
How can the following code be utilized
<apex:page standardCOntroller = "My_Object__c" recordSetvar
= "records">
<apex:pageBlock>
 <apex:pageBlockTable value = "{!records}" var = "r">
  <apex:column value = "{!r.Name}"/>
 </apex:pageBlockTable>
</apex:pageBlock>
4. </apex:page>
```

Ans: As the target for a custom list button on the My_Object__c object

5. Match the dynamic apex features with corresponding syntax. Features

a. Describe object/field

b. Dynamic: SOQL

c. Dynamic DML

d. Dynamic SOSL

Ans: a-1; b-2; c-3; d-4

6. A customer has requirement to filter on columns in the related list. As a developer how will you accomplish

Ans: Build a visual force component with filter to replace the reated list section of the page layout

7. A job application object has a child review object to store candidate review. The review needs to be tracked between a score of 1 to 5. The score has to be a choice between 1 and displayed as a radio button How will a developer cater to this requirement

Ans: Create visual force page with radio buttons for review object

8. An organization has created a HR application which contains a custom object for job positions and candidates for those positions. The HR managers want to see a view of the position with the best candidates for that position and not just all the candidatos listed. What is the best method to fulfill the requirement?

9. Ans: Add an inline visualforce page on the job position page layout
